

**F5320 Parent Consent Form (Education)**

**Acceptable Technology Use Parent Consent Form**

Dear Parents and Students,

Internet service is used in your student's education at Dutton Christian School. Along with that comes the necessity of some guidelines. The technology committee, the school board and the teaching staff have formulated and agree upon the following rules. Please read and discuss them together, then sign and return this form.

The Dutton Christian School Acceptable Technology Use policy states that:

1. Students will use the Internet as one information source for specific assignments. Students will also continue to use other information resources such as books, magazines, and CDs.
2. Students will use the Internet to access sites, including search engines that have been preplanned by their teachers and media center staff.
3. Student use of the Internet will be supervised and be electronically filtered.
4. Students who need to print information from the Internet must have pre-approval by the supervising staff.
5. Students are responsible for adhering to copyright guidelines.
6. Students are responsible for avoiding sites that are profane, obscene, or that advocate illegal acts, violence or discrimination towards other people.
7. General subject browsing, personal printing, personal e-mail, non-educational games, personal chat rooms, and downloading will not be allowed.
8. Violation of these Internet guidelines may include the immediate loss of computer use privileges.

We agree to these policies.
